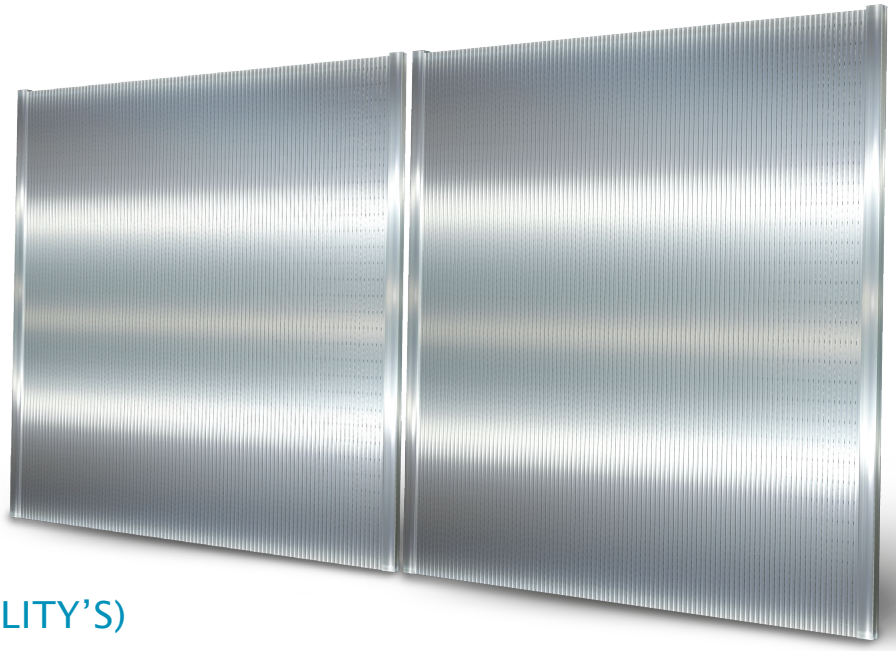
DELTA™ SCREENS

# Delta FISH DIVERSION Screens



## A FISH'S (& FACILITY'S) BEST FRIEND.

When reducing maintenance costs and protecting aquatic life are your top priorities, non-plugging continuous slot screens from Delta Screens are your answer.

Delta Screens can custom manufacture fish diversion screens using a variety of wire and rod sizes, with additional framing/support added as needed to fit your application. The non-corrosive stainless steel materials resist leaching making our fish diversion screens an environmentally friendly option. And, if needed, specialty treatments can be applied to counter issues such as zebra mussel attachment.
