

## Delta HUB LATERALS

### NON-PLUGGING SO THEY NEVER DISAPPOINT.

Hub laterals by Delta Screens promote even distribution while also avoiding flow/pressure concentrations. The non-plugging hub style design is ideal for accommodating disc head vessels. Made to your specification of size, open area and material, you can expect easy maintenance and exceptional long term durability. Delta Screens builds hub laterals to your specifications for material, wire and rod size as well as open area.
