SCREENS**A NEW CHOICE FOR SCREENS
A NEW PASSION FOR PRECISION.**

A NEW SCREEN FOR EXTREME CONDITIONS.

Introducing DeltaExtreme™ a premium direct wrap screen for difficult high-pressure completions. Delta has combined direct wrap screen with premium mesh filtration technology to create a cutting-edge screen, incorporating the added feature of an internal drainage layer that provides redundant filtration in the unlikely event of a primary filtration media failure.

Extremely damage resistant, the high burst design is ideal for deep high-pressure reservoirs, injection wells or low bottom hole pressure situations where fluid loss pills may be required.

SUCCESSFUL COMPLETIONS BEGIN WITH DELTA SCREENS.

An independent oil and natural gas producer used DeltaExtreme™ in a deep shelf sub-salt well, drilled to a total depth of approximately 20,000 feet, in a water depth of 372 feet.

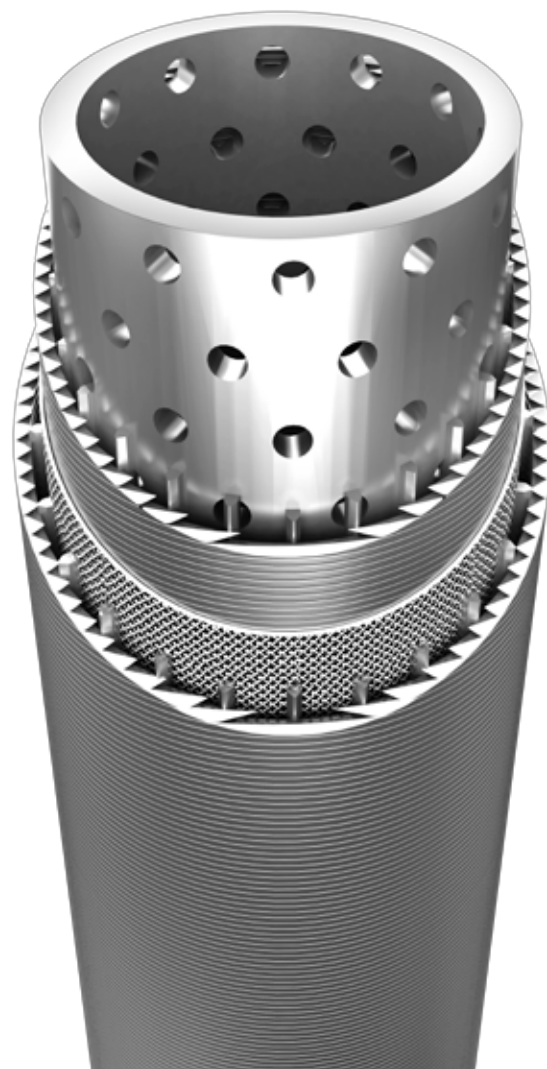

The new well has exceeded pre-drill production expectations and proved to be a substantial producer, providing excellent economic returns, and strong anticipated production rates for many years to come.

PUT US TO THE TEST

We are a world-class screen manufacturer. Our investment in cutting-edge technology and highly skilled people is focused on delivering the best screening solution - and value - in the industry. Allow us to demonstrate this for you. Call us with details of your next project.
