

## Delta OUTER Screens

### KEEP FILTER MEDIA MOVING.

Delta outer baskets deliver long-lasting, dependable media retention and high volume flow in radial flow systems. With a vertically oriented continuous slot design, Delta outer baskets allow catalyst media to slide up and down against the screen without chafing or plugging. Precision welded for superior strength and long-lasting durability, our outer baskets offer years of efficient and consistent flow rates. Whatever your application, Delta Screens can manufacture outer baskets in a wide variety of materials and sizes. Use in combination with Delta centerpipes for the highest level of efficiency in catalytic refining processes.

*To capture contaminants in radial flow processes.*
